Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 August 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed May 26th, 2004 has been considered in part. References 6,083,260 & 6,395,026 were not considered, since they were previously cited by the examiner in the last communication (see form PTO-892 mailed 05/05/04).

Response to Amendment

Applicant has amended claims 1-9 and cancelled claim 10. As a result, claims 1-19 remain pending.

The amendments to claims 1-9 have overcome the rejection under 35 U.S.C. §102(b) to Jarvik and therefore the 102(b) rejection has been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-10 are finally rejected under 35 U.S.C. 102(e) as being anticipated by Aboul-Hosn (6,083,260). Aboul-Hosn discloses a cannula pump having an inner (20) and an outer (30+40) conduits with a pump (50) disposed within the conduits. The device cannula portion (20) has a preformed curve. Aboul-Hosn further teaches that the pump has a drive unit (80) to control the pump's speed. Since no explicit structure is claimed, the drive unit is seen to be equivalent to applicant's control circuit. With respect to the limitations of the placement of the conduit in various locations of the heart, they are functional recitations of using the device. The functional recitations have not been given patentable weight because it is in narrative form. In order to be given patentable weight, a functional recitation must be expressed as a "means" for performing the specified function, as set forth in 35 USC § 112, 6th paragraph, and must be supported by recitation in the claim of sufficient structure to warrant the presence of the functional language. *In re Fuller*

Response to Arguments

Applicant's arguments filed August 09, 2004 have been fully considered but they are not persuasive. The Petition filed requesting benefit under 35 U.S.C. §102(e) to Patent Application 08/933,566, now U.S. Patent No. 6,083,260 was dismissed (paper to follow). Therefore, the rejection under 35 U.S.C. §103 to Aboul-Hosn (6,083,260) has been maintained since Aboul-Hosn ('260) discloses the invention as claimed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
